David R. Kaufman

Secretary

Les M. Viner

Campaign Chair

Richard V. Pilosof

Chief Executive Officer

Joseph Mapa

**Foundation Vice President
& Chief Financial Officer**

Terry J. Caputo

Dear Miles,

It is our great pleasure to thank you for everything you have done for Sinai Health System over more than 25 years. From your singular role in making the *Leadership Sinai* fundraising group so spectacularly successful, particularly through its annual Sinai Golf Classic event, to your tremendous personal philanthropy that has elevated patient care and improved patient outcomes, to the roles you have played on numerous governance boards and committees, we are truly grateful for your commitment to Mount Sinai Hospital, part of Sinai Health System.

Your most recent gift to support the Miles Nadal Family Heart Centre means that heart failure patients (the 99% of heart disease patients who never receive a heart transplant) receive the very best care available in leading-edge facilities, giving them the opportunity to continue enjoying their lives and spending quality time with their loved ones. The Miles Nadal Family Heart Centre also hosts a world-leading team of experts who are at the very forefront of understanding how heart disease looks and acts *differently* in women. Their studies have conclusively shown that women need to be treated differently than men with heart disease; their findings have led to a 360° re-evaluation of heart treatment protocols for women and, today, are improving health outcomes for women with heart disease around the world.

Your historic support also extends to Sinai Health System's esteemed Lunenfeld-Tanenbaum Research Institute, one of the world's top 10 biomedical research facilities, where our scientists seek answers to today's most vexing and critical health problems – from cancer to Alzheimer's disease, to chronic disease management, to preterm birth, to orthopedics, and even to how the healthcare system itself can be re-engineered to better meet the needs of our rapidly aging population.

On behalf of all our patients, physicians, researchers, nurses, and allied health professionals, thank you, Miles, for your support, friendship, and commitment to Sinai Health System's future success.

Sincerely,

Joseph Mapa
